SECTION A - A S: 1:50

Note of release:

This plan is just a recommendation and must only be used after release by the planner / architect commissioned by the building owner or approval by the direction of works authorised by the building owner!  
AGROB BUCHTAL SOLAR CERAMICS GmbH expressly excludes liability for all kinds of damages which may result from the plans!  
Without corresponding release the documents are used on the own responsibility and at the sole risk of the executive of construction works.

This plan has been examined, found correct and released for execution:

Place, date Stamp and signature

SWIMMING POOL  
PETYNKA  
CZ-PRAG

--- static movement joints / joints in the structure  
--- additional movement joints in the ceramic covering  
Movement joints are to be positioned according to static requirements and local conditions or in accordance with the instructions of the architect or responsible resident engineer. All movement joints, additional expansion joints in the covering etc., which are shown in drawings from the service for architects, shall be regard as recommendations only.  
Our suggested methods of sealing are given for guidance only.  
Binding instructions must be given by the architect or supervision of construction.  
We recommend to use reaction resin for filling the joints in the whole pool head area, including channel, in case of chemical stresses caused by salt-, sea or thermal water, the entire pool should be jointed with reaction resin.  
It is absolutely necessary to follow the processing instructions given by the manufacturer / supplier.  
The currently valid FNA rules as well as the regulations of the country in question have to be observed.  
Number and position of channel outlets are to be fixed by the expert planner.  
Our instructions concerning the cleaning of ceramic coverings have strictly to be observed.  
The colour representation in this plan is non-binding and may partly considerably differ in reality!
